4. SERVICE AND RATE DESCRIPTION

.1 Message Telecommunications Service (MTS)

Unless otherwise noted herein, Message Telecommunications Services (except SPRINT Service) are available only to a maximum of two residential phone lines, per location. (N) (N)

.1 SPRINT Service

SPRINT Service is an intercity service which is available for use by subscribers twenty-four (24) hours a day. The subscriber will use one or more of the three following dialing patterns to gain access to the Sprint fiber optic network:

.A In Feature Group D (FGD) exchanges, subscriber's telephone line(s) presubscribed to Sprint are programmed by the local exchange company (LEC) to automatically route "1+" calls to the Carrier's network.

.B Customers who have selected Sprint as their "secondary" interexchange long distance carrier dial "1010XXX+" to access the Carrier's network. This dialing procedure would also be used by SPRINT Casual Caller customers (LEC billed).

.C In some LATAs, in areas where equal access conversion has not yet occurred, some SPRINT Service subscribers dial an access number and authorization code to gain access to the Carrier's network.

Subscribers may originate and terminate SPRINT Service as described in Section 2. In the event Sprint determines that provision of SPRINT Dial-Up Service via a seven digit access number and authorization code imposes a significant risk of fraudulent use of its service, Sprint, at its discretion, may choose not to process new orders for Dial-Up Service and/or may, after written notice, cancel existing subscribers' authorization codes. In such cases, Sprint will continue to offer customers its "800" access FŌNCARD^{sm} Service. SPRINT DIAL "1" Service or the "1010XXX" access number will also be offered where equal access (FGD) is available. Subscribers who use SPRINT Dial-Up Service in conjunction with automatic dialing equipment may be exempted from this requirement when Sprint determines that the likelihood of fraudulent use of the service using such equipment is not significant.

.1 SPRINT Service (Continued)*

SPRINT Service is provided as the intrastate add-on service to business and residential interstate SPRINT Service and, accordingly, the SPRINT Service monthly recurring charge is located in Sprint's interstate Residential Schedule located at www.sprint.com/ratesandconditions. Charges for SPRINT Service are based on the distance and duration of the call, and the rate period when the call is placed. If FGD Access and/or SPRINT Universal "800" Access is used, the distance will be measured from the rate center of the calling number as represented by the ANI to the rate center of the called number. If FGB Access (SPRINT Dial-Up via "950" number) is used, the distance will be measured from the rate center of the "tandem location" or network site to which the FGB circuit is connected. Per-minute usage rates for SPRINT Service are set forth in Section 5.1. Directory Assistance, Operator Services and Travel Service are available to SPRINT subscribers at rates set forth in Section 5.6. .7 Prepaid Calling Card Services

Effective September 30, 2008, STi Prepaid, LLC is the provider of service for all Sprint Communications Company, L.P. prepaid phone cards as set forth in this tariff. The intrastate rates will remain in effect for at least twelve months after this date. (N)

Sprint Prepaid Phone Card Service is an add-on to the interstate offering. Individual cards are specified in Section 6.7 of this tariff. Prepaid Phone Card Service allows a customer to pay a fixed dollar amount in advance for long distance calling over the Company's network. Prepaid phone cards may be plastic, a receipt, or a virtual card on the Internet. The customer uses a toll free number on the card to access the Company's network. The customer can place intrastate, interstate and international direct dial calls.

Minute increments of usage rates will be deducted on a real-time basis as the card is used until the full amount of the card is depleted unless specified elsewhere. For one-minute usage rate cards, fractional minutes are rounded up to the next full minute. The rates for all prepaid phone cards apply 24 hours a day, seven days a week.

The rates in effect at the time a customer purchases a card are the rates which will be in effect until the card is depleted. Certain cards are eligible for recharge. When a card is eligible for recharge, the same per minute rates apply unless otherwise stated in this tariff. A customer recharges the card by purchasing additional dollar increments by calling the toll free number on the back of the card. The customer must pay with a major credit card. The dollar amount will be added to the card once the credit card has been verified. Only one purchase is permitted within a 24 hour period and that single purchase cannot exceed $100.

The customer will be notified in advance of the depletion of the card. The expiration date or policy is stated on the back of the phone card. The Voice Response Unit advises the caller when there is one minute remaining on the card.

Directory Assistance calls may be placed with prepaid phone cards for which a Directory Assistance rate is specified. Calls placed from a rotary phone will default to a Company Operator or to a speech recognition utility for call dialing only. Connection Fees and Surcharges, if applicable, are listed with each individual card for which they apply and are assessed.

.2 Clearline Digital Data Services

The following rates apply to Clearline Digital Data Services (DDS). These services are available on a monthly basis as well as one through five year commitment terms. DDS is available on a monthly basis only with customer-provided ADN access. DDS has three rate elements, which are described below.

.1 Base Interexchange Charges*

The charge for this portion of DDS is for transportation of traffic between Carrier's POPs. Charges are based on airline mileage as calculated using the formula presented Section 4.3, Mileage Between Rate Centers. Each DDS circuit connected between two subscribers interface points will be construed as an individual circuit for rate compilation purposes. To calculate the charge for a DDS circuit, add the fixed charge plus the charge per mile times the total number of V&H miles.

* Sprint's Base Interexchange Charges mirror the Company's interstate Clearline Digital Data Services Circuit Charges for Monthly Service Rate and Annual Rate Plans. See Sprint's Business Schedule 7 at www.sprint.com/ratesandconditions.

\# Effective February 13, 2008, Private Line Services will no longer be available to new customers. (N) Existing customer's term plans may be renewed by Sprint at the end of the customer's term. (N)
