

3.0 - DESCRIPTION OF SERVICE

3.2 Product Descriptions (Continued)

3.2.5 Optional Calling Features

3.2.5.B Class Features (Continued)

11. Toll Restriction - Restricts associated line from reaching dialing codes required to access long distance carrier networks to place long distance calls.

12. Telemarketer Screening: Is a service that intercepts calls that are delivered as “unknown” or “out-of-service” to a subscriber’s line. The service plays an announcement stating that the subscriber they have called does not accept calls from telemarketers. In addition it allows callers who are not telemarketers to dial “1” and the call will be completed. The subscriber must pre-requisitely subscribe to Call Identification in order to receive this service.

13. Remote Activation of Call Forwarding: Allows subscribers who subscribe to Call Forwarding to activate or deactivate Call Forwarding or change the forwarded-to destination from a remote location (away from the subscriber’s residence or business). The feature is evoked by dialing the access number and Personal identification number(PIN) assigned by telephone company.

14. Find Me Follow Me Simultaneous Ring: Allows subscribers to receive calls at multiple preselected phone numbers. Unanswered calls will move on to the next preselected number or all phone numbers may ring simultaneously.
