S10. BRI for Residential Services (BRI-R)

S10.7.1 General

- A. BRI-R (BRI functionality for Residential subscribers) mirrors the functionality of Integrated Services Digital Network (“ISDN”) Base Rate Interface (BRI) supporting simultaneous transmission of two (2) voice conversations without utilizing an additional local loop facility.
- B. Provides capability to receive and make calls simultaneously by providing two telephone numbers.
- C. Available as residential service only. Cannot be combined with or offered as a business service.
- D. Signal may be provided with circuit or packet switching.
- E. Service is available at the discretion of the Company and is subject to operating limits and capabilities of existing facilities.
- F. By definition, this service will always be part of a bundle including at least two local exchange service lines.
- G. Subscriber line charges do not apply to second line. ISDN port charges do apply to the total service in addition to one subscriber line charge. All mandatory fees and additional service options apply.

S10.7.2 Regulations

- A. Customer Premises Equipment (CPE) that is compatible with BRI residential service is the responsibility of the user for provisioning.
- B. The company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provisioning of BRI render any facilities provided by the customer obsolete or require modification
