RE: tw telecom of south carolina llc
South Carolina PSC Tariff No. 6 – Access Services

Dear Ms. Boyd:

Attached for filing please find the original of the above referenced tariff filing submitted on behalf of **tw telecom of south carolina llc**. The purpose of this revision is to make text changes to the VoIP-PSTN language to reflect changes to the originating Toll VoIP-PSTN access charge language pursuant to the Second Order on Reconsideration in Docket WC10-90 et al, FCC Order No. 12-47 (Released April 26, 2012). The Company respectfully requests an effective date for this filing of July 21, 2012.

The following tariff pages are included with this filing:

7 th Revised Page 1	Updated Check Sheet
3 rd Revised Page 32.1	Revises VoIP-PSTN language
1 st Revised Page 32.2	Revises VoIP-PSTN language
2 nd Revised Page 32.3	Revises VoIP-PSTN language

Please acknowledge receipt of this filing by date-stamping the extra copy of this cover letter and returning it to me in the self-addressed, stamped envelope provided for that purpose.

Any questions you may have regarding this filing should be directed to my attention at 407-740-3002 or via email to cwightman@tminc.com. Thank you for your assistance in this matter.

Sincerely,

/s/ Connie Wightman

Effective Date: July 21, 2012

ACCESS SERVICE TARIFF

SECTION 2 - TERMS AND CONDITIONS, (CONT'D.)

2.18 Jurisdictional Reporting and Identification of Toll VoIP-PSTN Traffic, (Cont'd.)

2.18.2 IntraLATA Toll Usage, (Cont'd.)

When a Customer terminates IntraLATA Toll Usage, its projected Percent Local Usage (PLU) must be provided to the Company. Except to the extent the Company has sufficient call detail to determine the jurisdiction of the call, these percentages will be used by the Company to apportion the usage and/or charges between IntraLATA Toll and local until a revised report is received as set forth herein.

To the extent that sufficient call detail is unavailable and the Customer has failed to provide its projected PLU, the Company shall allocate unidentifiable minutes subject to the PLU as 50 percent IntraLATA Toll Usage traffic and 50 percent local traffic.

Based on distribution of traffic (identifiable, Customer based PLU, Default PLU), the Company may derive an aggregated factor.

2.18.3 Identification of VoIP-PSTN Traffic

This section governs the identification of Toll VoIP-PSTN Traffic that is required by the F.C.C. in its Report and Order in WC Dockets Nos. 10-90, etc., F.C.C. No. 11-161 (November 18, 2011) (F.C.C. Order) and Second Order on Reconsideration FCC 12-47 (April 25, 2012) ("Second Order") to be compensated at interstate access rates, unless the parties have agreed otherwise. Specifically, this section establishes the method of separating Toll VoIP-PSTN Traffic from the Customer's traditional intrastate access traffic, so that Toll VoIP-PSTN Traffic can be billed in accordance with the F.C.C. Order and Second Order. (T) (T) (T) (T)

A. Calculation and Application of Percent-VoIP-PSTN-Usage Factors

The Company will determine the number of relevant VoIP-PSTN Traffic minutes of use ("MOU") to which interstate rates will be applied under Section 3.1.4, by applying a Percent VoIP Usage ("PVU") factor to the total intrastate access MOU (however determined – either based on call detail information, access lines or PIU) exchanged between the Company and the Customer, until July 21, 2012 and after July 1, 2014. From July 21, 2012 through June 30, 2014, the PVU will be applied only to terminating intrastate access MOU. The PVU will be derived and applied as follows: (T) | (T)

Issue Date: July 16, 2012

Effective Date: July 21, 2012

ACCESS SERVICE TARIFF

SECTION 2 - TERMS AND CONDITIONS, (CONT'D.)

2.18 Jurisdictional Reporting and Identification of Toll VoIP-PSTN Traffic, (Cont'd.)

2.18.3 Identification of VoIP-PSTN Traffic, (Cont'd.)

A. Calculation and Application of Percent-VoIP-PSTN-Usage Factors, (Cont'd.)

1. The Customer will calculate and furnish to the Company a factor (the "PVU-A") representing the percentage of the total intrastate access MOU that the Customer exchanges with the Company in the State, that (a) is terminating access sent to the Company and that originates in IP format; or (b) is originating access received from the Company and terminates in IP format until July 21, 2012 and after June 30, 2014. This PVU-A shall be based on information such as the number of the Customer's retail VoIP subscriptions in the State (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information. (T)
 2. Company will, likewise, calculate a factor (the "PVU-B") representing the percentage of the Company's total intrastate access MOU in the State that the Company originates or terminates in IP format. From July 21, 2012 through June 30, 2014, the PVU-B will represent only terminating access MOU. This PVU-B shall be based on information such as the number of the Company's retail VoIP subscriptions in the State (e.g., as reported on FCC Form 477), traffic studies, actual call detail, or other relevant and verifiable information. (T)
 3. The Company will use the PVU-A and PVU-B factors to calculate an effective PVU factor that represents the percentage of total intrastate access MOU exchanged between the Company and the Customer that is originated and/or terminated in IP format, whether at the Company's end, at the Customer's end, or at both ends. From July 21, 2012 through June 30, 2014, the PVU will represent only terminating intrastate access MOU. The effective PVU factor will be calculated as the sum of: (A) the PVU-A factor and (B) the PVU-B factor times (1.0 minus the PVU-A factor). (T)
 4. The Company will apply the effective PVU factor to the applicable intrastate access MOU exchanged with the Customer, as described above, to determine the number of relevant VoIP-PSTN Traffic MOUs. (T)
- Example 1: The PVU-B is 5% and the PVU-A is 10%. The effective PVU factor is equal to $14.5\% \text{ PVU-A} + (\text{PVU-B} \times (1 - \text{PVU-A})) = \text{PVU}\%$. The Company will bill 14.5% of the Customer's applicable intrastate access MOU in accordance with the Company's interstate switched access tariff. (T)

Issue Date: July 16, 2012

Effective Date: July 21, 2012

ACCESS SERVICE TARIFF

SECTION 2 - TERMS AND CONDITIONS, (CONT'D.)

2.18 Jurisdictional Reporting and Identification of Toll VoIP-PSTN Traffic, (Cont'd.)

2.18.3 Identification of VoIP-PSTN Traffic, (Cont'd.)

A. Calculation and Application of Percent-VoIP-PSTN-Usage Factors, (Cont'd.)

4. (Cont'd.)

Example 2: The PVU-B is 0% and the PVU-A is 10%. The effective PVU factor is $10\% \text{ PVU-A} + (\text{PVU-B} \times (1 - \text{PVU-A})) = \text{PVU}\%$. The Company will bill 10% of the Customer's applicable intrastate access MOU in accordance with the Company's interstate switched access tariff. (T)
(T)

Example 3: The PVU-A is 100%. No matter what the PVU-B factor is, the effective PVU is 100%. The Company will bill 100% of the Customer's applicable intrastate access MOU in accordance with the Company's interstate switched access tariff. (T)
(T)

5. If the Customer does not furnish the Company with a PVU-A pursuant to the preceding paragraph 1, the Company will utilize a PVU equal to the PVU-B. For example, if the PVU-B factor is 0%, the Company will utilize a PVU equal to zero.

6. The Customer shall not modify their reported PIU factor to account for Toll VoIP-PSTN Traffic. (T)

7. The Customer shall retain the call detail, work papers, and information used to develop the PVU factors for a minimum of one year.

B. Initial Implementation of PVU Factors

1. The PVU factors were implemented in the Company's billing system on May 15, 2012. Usage billed after May 15, 2012 will be processed pursuant to paragraph 2.18.3.A.5 above and 2.18.4 below.
