Mr. Charles Terreni, Chief Clerk
 South Carolina Public Service Commission
 Synergy Business Park
 101 Executive Center Drive
 Columbia, South Carolina 29210

Dear Mr. Terreni:

Enclosed for filing please find revisions to the United Telephone Company of the Carolinas LLC, General Subscriber Services Tariff. These revisions are submitted with a June 13, 2008 issue date and a proposed effective date of June 20, 2008. Embarq's tariffs are available on its website.

The tariff pages enclosed for review and approval are as follows:

Mr. Charles Terreni, Chief Clerk
June 13, 2008
Page 2

This filing proposes to grandfather certain Residence and Business Solutions bundles, Custom Calling Service features and packages and ExpressTouch features for which there is nominal demand. Demand for these services is declining as customers are selecting alternative services.

Text changes are proposed for certain Solutions packages to list the individual features included in the bundle rather than the Custom Calling Package for standardization and to better depict the features included in each bundle. The names of certain Custom Calling Services packages and ExpressTouch features are also revised for standardization. None of these changes impact customers or the manner in which the services are provided.

Acknowledgement and date of receipt of this filing are requested.

Commission consideration and timely approval of these pages are respectfully requested. Upon approval, please return one stamped approved copy of this filing for our records. If you have questions or need additional information regarding this filing, you may call me or Cheryl Sweitzer at (919) 554 7135.

Sincerely,

LuVon Richardson

U13. MISCELLANEOUS SERVICE ARRANGEMENTS

U13.9 CUSTOM CALLING SERVICES

U13.9.1 GENERAL

Call Waiting – Obsolete – See Section U100.

(C)

(O)

(O)

a. Enhanced Call Waiting

(T)

Provides the **subscriber, who is on a call, with a tone signal when another caller is trying to reach that number. The subscriber may ignore the incoming call or terminate the original call and answer; or through the use of hookswitch flashes, put the original call on hold and receive the incoming call; or alternately, talk on both calls until one is terminated. This feature includes Call Waiting Control.** Call Waiting Control allows subscribers to cancel the call waiting function for the duration of one (1) call. Subscribers may activate the Cancel Call Waiting Feature either before or during a call to prevent call waiting tones from interrupting the call. During the time the cancel feature is activated, incoming callers receive a busy tone. When the call is terminated, the call waiting function is automatically reactivated.

(T)

(T)

b. Call Forward Features

Call Forward Features permit the forwarding of incoming calls under a variety of conditions to another telephone number either by dialing an activation code or via pre-programming by the Company. Calls may be forwarded to any number subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. The customer subscribing to this service is responsible for applicable usage charges. Only one call forwarding arrangement, consisting of a single calling path, will be provided per exchange service line for which the customer subscribes to this feature, unless the customer is also subscribed to the Call Forward Additional Paths feature, in which instance one call path per Call Forward Additional Path feature subscribed to will be provided.

Call Forward Features shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part, of usage charges that would regularly be applicable between the station originating the call and the station to which the call is ultimately transferred. If the Company determines that Call Forward Features are being used in manner not consistent with the intent of the service or in any other way violates the restrictions of the service, the Subscriber will be determined ineligible for the service and the service will be removed from the Customer's account.

e. SignalRing Plus

Allows the subscriber to add a second directory number to the same telephone line. Both numbers have coded rings. Includes an additional directory listing at no additional charge.

(T)

(O)

(O)

f. Call Waiting ID

(T)

Enables the subscriber to view on an Analog Display Services Integration (ADSI) compatible CPE display device the calling party's name and telephone number associated with an incoming call waiting call, unless the name and telephone number of the calling party is suppressed, either via Per Call or Per Line Blocking. This gives customers the opportunity to identify incoming callers without interrupting their current call. Subscription to Caller ID and **Enhanced** Call Waiting is required in order to subscribe to Call Waiting ID.

U13.9.1 GENERAL (Cont'd)

g. Three-Way Calling

Allows the subscriber to add a second party to an existing conversation. If either of the parties hands up, the subscriber may continue the conversation with the remaining person or add a different second party.

Three-Way Calling is available on a flat rate or usage sensitive basis. Under the usage sensitive basis, the customer will only be billed for successful activations. If, during a three-way call, one party disconnects and another party is connected, and additional activation charge will apply. The provision of this service is on an usage sensitive basis is subject to technical limitations and is provided on a where available basis. Upon the customer's request, blocking of this feature is available at no charge.

U13. MISCELLANEOUS SERVICE ARRANGEMENTS

U13.22 EXPRESSTOUCH SERVICE

U13.22.1 GENERAL

- a. ExpressTouch services are a group of central office-based call management features that forward the calling party's number to a terminating central office, allowing customers to effectively manage their call flow. ExpressTouch services work only on calls that originate and terminate within ExpressTouch equipped offices, i.e., calls within a single ExpressTouch equipped office or calls between ExpressTouch equipped offices linked by Signaling System 7 (SS7) network technology.

U13.22.2 REGULATIONS

- a. ExpressTouch services are provided from specially equipped Company Central Offices and enable customers to access various features by dialing a specific code on either a rotary-dial or Touch-Tone calling basis. ExpressTouch services are not provided on dial tone lines serving any Private Branch Exchange (PBX).
- b. The customer of record will be responsible for all rates and charges associated with ExpressTouch services as described in Section U13.22.4 following. The customer of record will be charged for all features activated on his service and charged the applicable monthly subscription rate for each line on which ExpressTouch services are provided.
- c. The services are available to residence and business customers who have rotary or Touch-Tone service for calls within the ExpressTouch service area. Customers with rotary service can access ExpressTouch by dialing "11" instead of "****".
- d. ExpressTouch can be provided on a stand alone basis or may be enhanced by use with Custom Calling Service features as described in other sections of this tariff.
- e. An ExpressTouch customer may employ available ExpressTouch features only under the following conditions:
 - (1) When both the ExpressTouch customer and the other party involved in the call are served from the same central office, even if the other party does not subscribe to ExpressTouch.
 - (2) When both the ExpressTouch customer and the other party involved in the call are served from different central offices which are linked by facilities that can handle the delivery of the calling number, even if the other party does not subscribe to ExpressTouch.
- f. Where the customer subscribes to **Caller ID**, the calling **name and** number will be forwarded from the terminating central office to the customer provided Customer Premises Equipment (CPE) display unit. (T)

U13. MISCELLANEOUS SERVICE ARRANGEMENTS

U13.22 EXPRESSTOUCH SERVICE (Cont'd)

U13.22.2 REGULATIONS (Cont'd)

- g. Service charges do not apply when these services are installed.
- h. ExpressTouch features cannot be activated for PBX equipment, Payphone Line Service, ISDN-PRI or ISDN-BRI.
- i. Number delivery for calls originated from PBX will display the main PBX number only.
- j. Caller ID Per Line Blocking is available at no charge to law enforcement and crisis intervention agencies as follows:

- (1) The agency should establish that its business is law enforcement or one which the divulgence of identities over the telephone could cause serious personal or physical harm to its employees or clients, such as a domestic violence intervention agency and;
- (2) The agency should establish that the forwarding of numbers through **Caller ID-Number Only or Caller ID with Name** would seriously impair or prevent it from performing its business and;
- (3) The agency should establish that no reasonable offering by the Company, other than blocking, will protect its desired anonymity.

(T)

The head of the agency must submit written certification on official letterhead to local Company management citing the need for blocking when the conditions outlined in this tariff are met.

- k. Due to Caller ID Blocking, **Caller ID-Number Only or Caller ID with Name** feature is not suitable for the provision of 911 or E911 and is, therefore, not available to 911 or E911 providers.

U13. MISCELLANEOUS SERVICE ARRANGEMENTS

U13.22 EXPRESSTOUCH SERVICE (Cont'd)

U13.22.3 EXPRESSTOUCH FEATURES

a. Return Call

Return Call enables a customer to place a call to the telephone number associated with the most recent call received, whether or not the call was answered or the number is known. The customer can dial an activation code to request that the network place the call.

If the called line is available, the call is completed. If the called line is not available (busy or not answered) and the Return Call feature is activated, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next thirty (30) minutes, both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the calling customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed. If the customer has Calling Number Delivery, the calling party's number will be displayed simultaneously with the distinctive ring.

If the last incoming call originated from a telephone where delivery of the number was suppressed, either via per call or per line blocking, the Return Call feature will not activate.

Return Call is available on a flat rate or a usage sensitive basis. Under the usage sensitive basis, whether the customer chooses to advance the call or abandon the call, the activation charge will apply. The provision of this service on a usage sensitive basis is subject to technical limitations and is provided on a where available basis.

b. Repeat Dial

(T)

Repeat **Dial**, when activated, automatically redials the last number the customer dialed if the call was answered, not answered or busy. If the called line is available, the call will be placed. If the called line is not available, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next thirty (30) minutes, both the calling and called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed.

(T)

Repeat **Dial** is available on a flat rate or a usage sensitive basis. Under the usage sensitive basis, the customer will incur an activation charge whether the customer chooses to advance or abandon the call. The provision of this service on a usage sensitive basis is subject to technical limitations and is provided on a where available basis.

(T)

c. Call Trace

Call Trace enables the customer to initiate an automatic trace of the last call received, regardless of the time lapse since the last call, providing there have been no intervening outgoing calls. To initiate the trace, the customer must dial an activation code, then dial a "1". Upon activation by the customer, the network automatically sends a message to the Company indicating the calling number, the time the call was received and the time the trace was activated. The customer using this feature is required to contact the local Company business office for further action. The customer is not provided the traced number.

U13. MISCELLANEOUS SERVICE ARRANGEMENT

U13.22 EXPRESSTOUCH SERVICE (Cont'd)

U13.22.3 EXPRESSTOUCH FEATURES (Cont'd)

c. Call Trace (Cont'd)

If the customer makes or receives another call after hanging up from the traced call or if the Call Waiting feature (described in other Sections of this tariff) is activated prior to activating the trace, Call Trace will not record the correct number.

In situations where the Call Trace functionality is activated by a subscriber, information pertaining to nonpublished numbers will be provided to the authorized law enforcement agency upon request of the agency.

This feature requires no additional equipment on the customers' premises. This feature can be activated to trace calls that have originated from Payphone Line Service. Call Trace will trace only those calls which are originated from a location served by the ExpressTouch network.

A separate charge applies to each activation of this feature.

d. **Caller ID–Number Only – Obsolete – See Section U100.**

(Obsoleted 06/20/08, Type B, Tariff Reference, Section U13.) (N) (M)

- b. Call Waiting (O) (T)

Provides a subscriber, busy on a call, with a tone signal when another caller is trying to reach that number. The subscriber may then hold the first call, answer the second and talk alternately on each call.

- c. Hot Line (T)

Provides automatic routing of all calls to a predetermined number as soon as the telephone instrument is taken off hook. The predetermined number is assigned in the Central Office by the Company and cannot be invoked or revoked by the subscriber. The predetermined number may not be forwarded to a telephone operator or Company official number. The non-dial instrument used for Hot Line service cannot be used for normal telephone service.

- d. Warm Line (T)

Allows automatic routing of calls to a predetermined telephone number when the station is off-hook for a specified time period. The predetermined number is assigned in the central office by the Company and cannot be invoked or revoked by the subscriber. The predetermined number may not be forwarded to an operator or Company official number. The Warm Line delay feature allows use of a standard telephone instrument and normal telephone service.

- e. Call Waiting Options (T)

Provides Call Waiting ID by means of an Analog Display Services Integration (ADSI) compatible CPE display device as described above, and provides a variety of options for handling a second call. These options may be exercised without interrupting the current call. Options for call handling during an active call include answering the call, sending a "please hold" message, conferencing the caller with the current call or forwarding the caller to a voice mail system. This feature is only available in packages. (O) (M)

U100. OBSOLETE SERVICE OFFERINGS

U100.14 EXPRESSTOUCH SERVICE

U100.14.1 EXPRESSTOUCH FEATURES

(Obsoleted 06/20/08, Type B, Tariff Reference, Section U13.)

a. **Caller ID–Number Only**

(O) (T)

Caller ID–Number Only enables the display of the incoming calling telephone number on a Customer Premises Equipment (CPE) display device attached to the customer's telephone line. (NOTE: CPE must comply with Part 68 of the FCC Rules and Regulations). The number is delivered for continuous display during the silent period between the first and second ringing cycles. A telephone with display capability is required to receive and display the calling number information. The calling party must be part of the ExpressTouch network to have the number displayed.

(T)

The calling number for a call that has been call forwarded will be displayed on the forwarded station if it has the **Caller ID–Number Only** feature.

(T)

The Company will forward all telephone numbers, subject to technical limitations, including telephone numbers associated with Nonpublished Listing Service described in other sections of this tariff. Numbers from non-ExpressTouch offices cannot be delivered.

b. Anonymous Call Rejection (ACR)

(T)

Anonymous Call Rejection (**ACR**) allows customers to reject receipt of calls where number and/or name delivery has been blocked. The calling party who has chosen to block number and/or name delivery will hear a recorded announcement stating that the called party will not accept number or name blocked calls. Anonymous Call Rejection will be available free of charge to customers who subscribe to **Caller ID–Number Only** and Caller ID with Name.
