

RESIDENTIAL SAVE ENERGY AND WATER KIT
PROGRAM SEW-2

PURPOSE

The purpose of this Program is to promote reduced water consumption in residential dwellings and a corresponding reduction in electric hot water usage.

AVAILABILITY

This program is available to individually-owned dwellings served under any of Company's residential service schedules. Eligible residences must have an approved electric water heater serving 100% of Customer's domestic water requirements.

PROGRAM

Customer shall submit a request to participate in this program. Upon approval, Company will provide a water savings kit, at no charge to Customer, containing certain energy efficient water devices as well as an instructional guide describing self-installation. These devices may include, but are not limited to, low flow kitchen faucet aerators, bathroom faucet aerators, low flow shower heads and insulated pipe wrap.

GENERAL

Company is not responsible for ensuring proper installation of the water savings kit, but shall give reasonable additional guidance upon Customer's request. Company reserves the right to inspect Customer's installation at all reasonable hours to verify proper installation to support all required verification of energy efficiency goals.

Effective for service on and after September 23, 2015
