

RESIDENTIAL MULTI-FAMILY ENERGY EFFICIENCY PROGRAM (SC)

PURPOSE

The purpose of this program is to encourage the installation of new energy efficient measures and devices in multi-family apartments to reduce energy usage.

PROGRAM

- This program is available to property managers of individually-metered apartments consisting of four (4) or more dwelling units per building where the residences are served on a Duke Energy Carolinas' residential rate schedules from Duke Energy Carolinas' retail distribution system.
- Under this program, the Company will provide energy efficient measures including but not limited to high efficiency lighting and low flow water measures where the dwelling unit is served by its own electric water heater.
