Issue Date: September 3, 2008

Effective Date: September 4, 2008

Regulations, Rates and Charges applying to the provision of Intrastate Access Services within the serving areas of Charter Fiberlink SC-CCO, LLC

that each company involved in providing a portion of the Access Service agrees to bill under its respective Tariff.

National Security Emergency Preparedness (NSEP) Services: A system utilizing communications services developed to alert residents in an area of pending emergencies, i.e., weather warnings, etc.

Network: The Telephone Company's network located in the state of South Carolina.

Network Services: The Telephone Company's telecommunications Access Service offered on the Telephone Company's Network.

Non-Recurring Charge (NRC): The initial charge, usually assessed on a one-time basis, to initiate and establish Service or to change Service. NRC includes, but is not limited to, charges for construction, installation, or special fees for which the Customer becomes liable at the time the Service Order is executed.

Point of Presence (POP): Refers to a location or site containing telecommunications equipment that can include, but is not limited to, switches, multiplexers, modems, leased lines, and routers. A Carrier's Point of Presence usually means a location where the Carrier connects to other Carriers or its Customers.

Premises: Denotes a building, a portion of a building in a multi-tenant building, or buildings on contiguous property (except railroad rights-of-way, etc.) not separated by a public thoroughfare.

Presubscription: An arrangement whereby an End User may select and designate to the Telephone Company an IC it wishes to access, without an Access Code, for completing intrastate toll calls. The End User may select an IC for completing intraLATA toll calls and another for completing interLATA toll calls, or may select the same IC to complete both. The selected IC(s) are referred to as the End User's Primary Interexchange Carrier (PIC) for interLATA toll, and as the End User's intraLATA Primary Interexchange Carrier (LPIC) for IntraLATA toll.

(C)
|
(C)

Service: The telecommunications services offered by the Telephone Company provided under this Tariff.

Service Commencement Date: The first day following the date on which the requested Service or Facility is available for use, unless extended by the Customer's refusal to accept Service that does not conform to standards set forth in the Service Order or this Tariff, in which case the Service Commencement Date is the date of the Customer's acceptance of Service. The parties may mutually agree on a substitute Service Commencement Date. If the Telephone Company does not have an executed Service Order from a Customer, the Service Commencement Date will be first date on which the Customer used the Service.

Service Order: The request for facilities or Service by an Applicant or Customer. See also ASR

Switched Access: Access to or from the switched network of a Local Exchange Company for the purpose of originating or terminating communications.

4. Provisioning of Service

4.1. Description of Intrastate Access

4.1.1. General

Intrastate Access provides an IC access to Telephone Company's Network for purposes of termination or origination of intrastate toll calls carried by IC. Intrastate Access provides for the ability to originate calls from an End User's premise to the Customer's Point of Presence and to terminate calls from the Customer's Point of Presence to an End User's Premises.

Intrastate Access Feature group's are ordered in either quantities of lines or trunks or in Busy Hour Minutes of Capacity (BHMC), FGD Access Service is furnished on a pre-trunk basis in accordance with the capacity ordered in trunks or BHMC.

When intrastate Access is ordered in BHMC, the BHMC must be differentiated by Feature Group type and direction of traffic.

(D)
|
(D)

The Customer may order access for mixed intrastate and interstate communications. If the jurisdiction of the call cannot be determined, then, the development of a Percentage Interstate Usage (PIU) factor is required in order to estimate the amount of interstate traffic versus intrastate traffic.

4.1.2. Types of Switched Access Offered

The Telephone Company's Switched Access is provided via Feature Group D (FGD). FGD is defined as a trunk-side connection to the Telephone Company's network. The use of a line side connection is not offered through this Tariff.

Feature Groups are arranged for originating, terminating, or two-way calling, based on the end office switching capacity ordered. Originating calling permits the delivery of calls from the Telephone Company's exchange service locations to the Customer's premises.

Terminating calling permits the delivery of calls from the Customer's Point of Presence (POP) to Telephone Company's exchange service locations. Two-Way calling permits the delivery of calls in both directions, but not simultaneously.

**Regulations, Rates and Charges applying to the provision of Intrastate Access Services
within the serving areas of Charter Fiberlink SC-CCO, LLC****4.1.3. Descriptions of Feature Groups**

Telephone Company will provide Switched Access Feature Groups as follows:

Terminating FGB:

Feature Group B (FCB) is provided at the Telephone Company's end office switch to accommodate terminating traffic. FGB, when being received by Telephone Company from the Customer in the terminating direction, may be used to access valid NXXs in the Telephone Company's Exchange Area. Since Telephone Company's End Office is equal access, all terminating FGB usage will be subject to equal access rates. A separate trunk group will be established for terminating FGB traffic.

Originating and Terminating FGD:

Feature Group D (FGD), which is available to all Customers, provides trunk-side access to Telephone Company's switch with an associated 101XXXX access code for providers of MTS/WATS and MTS/WATS-type services or originating and terminating communications for Customer provided intrastate communications capability or connections to an interexchange interstate service.

FGD is provided as trunk-side switching through the use of Telephone Company's switch trunk equipment. The switch trunk equipment is provided with answer and disconnect supervisory signaling and wink start pulsing signals except when SS7 Out of Band Signaling is specified. (T)

4.1.4. Jurisdictional Determination

Where necessary to do so, for purposes of determining the jurisdiction of Switched Access traffic, Once the Switched Access service is activated, the following criteria will apply:

- (A) For originating FGD Switched Access services, where jurisdiction can be determined from the call detail, the Telephone Company will bill according to such jurisdiction. A projected Interstate percentage for originating FGD usage will be developed from call detail with known jurisdiction. For originating FGD usage where the jurisdiction cannot be determined from the call detail, the projected interstate percentage will be applied.
- (B) For terminating FGD Switched Access services, where jurisdiction can be determined from the call detail, the Telephone Company will bill according to such jurisdiction. For terminating FGD usage where the jurisdiction cannot be determined from the call detail, the Customer will provide an interstate percentage (PIU Factor) of terminating FGD minutes, as outlined below in (E). (T)
- (C) For FGB Terminating Switched Access Service, the Customer will provide an interstate percentage (PIU Factor) of FGB terminating minutes. Pursuant to Federal Communications Commission Order FCC 85-115 (adopted April 16, 1985), when

7. Rates, Charges and Fees

7.1. Explanation of Access Elements

Telephone Company is providing Service in the State of South Carolina according to the following arrangement. The equivalent of an "End Office" switch is located in its territory. Telephone Company's end user's are serviced off of that switch. If the Telephone Company's end users place an intrastate long distance call, the call is routed to the Company's Interexchange Carrier or the end user's designated Interexchange Carrier. From there, it is carried to the Interexchange Carriers Point of Presence. Telephone Company does not provide for direct Trunked Tandem connection at this time for long distance carriers.

(C)
(C)

The figure below provides the various access elements associated with this arrangement relating to switched access charges:

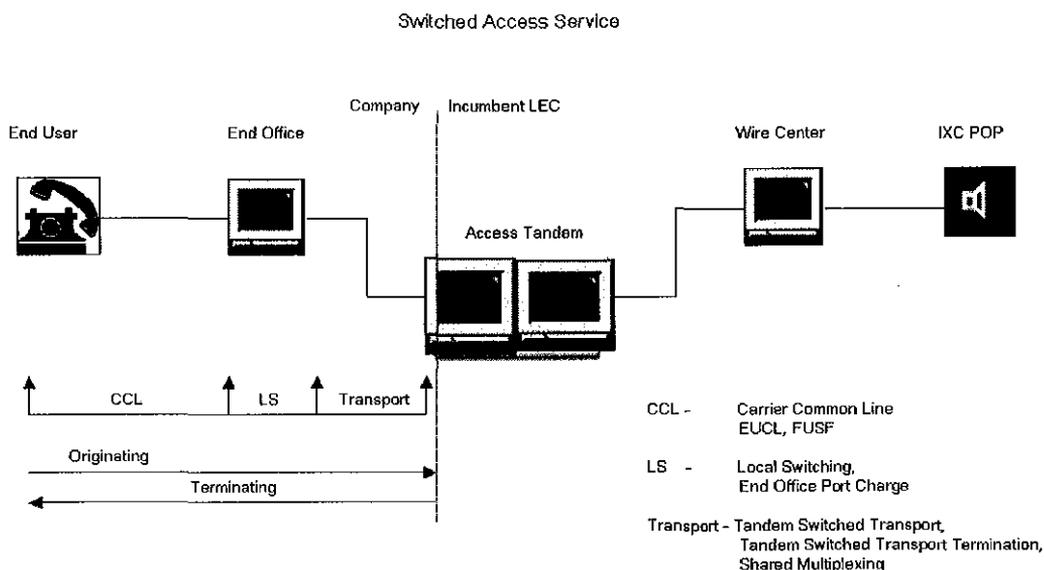

Figure 1 - Switched Access Rate Elements

Rates contained in this tariff are subject to subsequent adjustment, effective retrospectively, in the event the Commission or a court subsequently authorizes Telephone Company to correct its rates pursuant to pending motions, or petitions for reconsideration or waiver, or in the event of any other adjustment to an order of the Commission or a court.

7.1.1. Local Switching

Local Switching

8. Ordering, Rating and Billing – More Than One LEC

8.1. General

Each LEC will provide its portion of the Switched Transport or Special Transport service within its operating territory to the meet point with the other LECs . The LECs involved in providing the service will determine the Bill Percentage (BP).

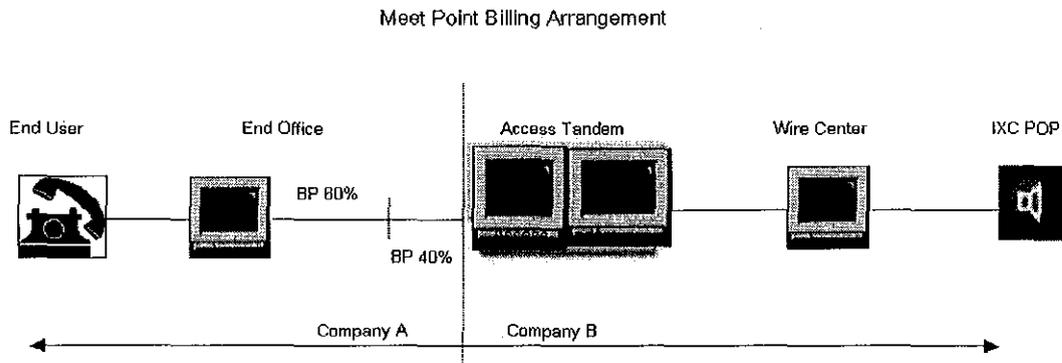

Figure 2 - Example of MPB Arrangement

For all Switched Access Services the order will be placed with the Telephone Company as specified in the Ordering and Billing Forum's Multiple Exchange Carrier Ordering and Design (MECOD) guidelines. The multiple billing arrangements described in this section are also subject to the provisions of the Multiple Exchange Carrier Access Billing Guidelines (MECAB) and the (MECOD) guidelines.

(T)

All recurring and non-recurring charges for services provided by each LEC are billed under each company's applicable Tariffs (Multiple Bill – Single Tariff). Under a Meet Point Billing arrangement, the Telephone Company will only bill for charges for traffic carried between the LEC's Tandem and the Telephone Company's Switch that serves the End Users and for the portion of any transport facilities provided by the Telephone Company between the Customer's location and the Telephone Company's Local Switching Center.

The Telephone Company must notify the Customer of the:

1. Meet Point Billing option that will be used;
2. Telephone company(s) that will render the bill(s);
3. Carrier(s) to whom payment should be remitted; and
4. Carrier(s) that will provide the bill inquiry function. The Telephone Company shall provide such notification at the time orders are placed for Access Service. Additionally, the Telephone Company shall provide this notice in writing 30 days in advance of any changes in the arrangement.

**Regulations, Rates and Charges applying to the provision of Intrastate Access Services
within the serving areas of Charter Fiberlink SC-CCO, LLC**

- (H) For tandem routed trunks, the dedicated trunk port shall be billed by the Telephone Company owning the tandem. For end office direct routed trunks, the dedicated trunk port shall be billed by the Telephone Company owning the end office on a multiple bill, single Tariff meet point billing arrangement.

(C)

8.2. Meet Point Billing

When the Switched Transport facility (Tandem-Switched Transport) is provided by more than one telephone company, the following regulations apply for Switched Access when the End Office is in the Telephone Company's Territory:

1. Distance sensitive transport provided by the Telephone Company will be rated according to the rates specified in this tariff for the Telephone Company's end office.
2. The transport termination provided by the Telephone Company will be rated according to the rates specified in this tariff to the Telephone Company's end office.

8.3. Rating and Billing of Service

Each company will provide its portion of the access service based on the regulations, rates and charges contained in its respective access service Tariff, subject to the following, as appropriate. The application of non-distance sensitive rate elements varies according to the rate structure and the location of the facilities involved. When rates and charges are listed on a per minute basis, the Telephone Company's rates and charges will apply to traffic originating from the LEC's Tandem and terminating at the End User's Premises, and vice versa.
