TARIFF FORMAT

- A. Page Numbering - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are added to the Tariff from time to time. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th revised page 14 cancels the 3rd revised page 14.
- C. Paragraph Numbering Sequence - There are seven levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.1
 - 2.1.1
 - 2.1.1 (A)
 - 2.1.1 (A).1
 - 2.1.1 (A).1.a
 - 2.1.1 (A).1.a.i
 - 2.1.1 (A).1.a.i (1)
- D. Check Pages - When a Tariff filing is made with the Commission, an updated check page accompanies the Tariff filing. The check page lists the pages contained in the Tariff with a cross-reference to the current revision number. When new pages are added, the check page is changed to reflect the revision.

2.4.2 The Service offered herein may be used for any lawful purpose, including residential, business, governmental, or other use. The Customer is liable for all obligations under this Tariff notwithstanding any sharing or resale of Services and regardless of the Company's knowledge of same. The Company will have no liability to any person or entity other than the Customer and only as set forth herein. The Customer will not use nor permit others to use the Service in a manner that could interfere with Service provided to others or that could harm the facilities of others.

SECTION 2 - RULES AND REGULATIONS

2.4 Use of Service (continued)

- 2.4.3 Service furnished by the Company will not be used for any unlawful or fraudulent purposes including but not limited to use of electronic devices, invalid numbers, and false credit devices to avoid payment for Service contained in this Tariff either in whole or in part. Service furnished by the Company may not be used to make calls which might reasonably be expected to frighten, abuse, torment, or harass another. The Service may not be used for any purpose for which any payment or other compensation is received by the Customer except when the Customer is an authorized communications common carrier, an authorized resale common carrier, or an enhanced or electronic service provider who has subscribed to the Company's Service. However, this provision does not preclude an agreement between the Customer, Authorized User, or Joint User to share the cost of the Service as long as this arrangement generates no profit for anyone participating in a joint use or authorized use arrangement.
- 2.4.4 Service furnished by the Company may be arranged for joint use or authorized use. The Joint User or Authorized User will be permitted to use such Service in the same manner as the Customer, but subject to the following conditions.

2.4.4 (continued)

- (C) All charges for the Service will be computed as if the Service were to be billed to one Customer. The Joint User or Authorized User which has been designated as the Customer will be billed for all components of the Service and will be responsible for all payments to the Company. If designated Customer fails to pay the Company, each Joint User or Authorized User will be liable to the Company for all charges incurred as a result of its use of the Company's Service. Each joint or Authorized User must submit to the designated Customer a letter guaranteeing payment for the joint or Authorized User's portion of all charges billed by the Company to the designated Customer. This letter must also specify that the joint or Authorized User understands that the Company will receive a copy of the guaranty from the designated Customer. The designated Customer will be responsible for allocating charges to each Joint User or Authorized User.
- (D) Joint use is a Service/billing allocation arrangement and not a resale arrangement. Neither the Customer nor any Joint User nor any third party engaged by either of them in connection with a joint use agreement or arrangement may mark up Service or otherwise profit from the joint use agreement or arrangement.

2.4.5 If the Company reasonably concludes that Customer-provided equipment does not pass back appropriate answer supervision to the long distance network, the Company will notify the Customer. If the Customer cannot correct the problem and if Customer-provided equipment continues to provide inappropriate answer supervision to the long distance network, the Company reserves the right to suspend or terminate the Customer's Service. SECTION 2 - RULES AND REGULATIONS

2.10 Disputed Charges

- 2.10.1 The Company will not be required to consider any Customer claim for damages or statutory penalties, or adjustments, refunds, credits or cancellation of charges, unless the Customer has notified the Company, in writing, of any dispute concerning charges, or the basis of any claim for damages, within sixty (60) calendar days after an invoice is rendered or a debit is effected by the Company for the call giving rise to such dispute or claim.
- 2.10.2 Any such notice must set forth sufficient facts to provide the Company with a reasonable basis upon which to evaluate the Customer's claim or demand. Such notice must be sent to the Company's Customer Service Department as per Section 2.11 of this Tariff. If the Customer is not satisfied with the Company's resolution of a billing inquiry, the Customer may make application to the Commission for review and disposition of the matter.

SECTION 2 - RULES AND REGULATIONS

2.12 Mileage Measurements

2.12.1 The mileage between rate centers is calculated based on V and H coordinates as obtained by reference to AT&T Tariff FCC No. 10. Calculation between Serving Wire Centers is based on V and H coordinates as obtained by reference to NECA FCC Tariff No. 4. The mileage for a call between Access Lines associated with stations that use the same rate center is one mile. If Feature Group B is used, the distance will be measured from the rate center of the tandem location or network site to which the Feature Group B line is connected. If Feature Group D access is used, the distance will be measured from the rate center of the calling number.

2.12.2 Airline mileage between service locations is calculated as follows:

FORMULA:

The square root of: $\frac{(V_1-V_2)^2 + (H_1-H_2)^2}{10}$

Where V_1 and H_1 are the V and H coordinates of point 1 and V_2 and H_2 are the coordinates of point 2.

Mileage is rounded up to an integer value to determine the airline mileage.

SECTION 2 - RULES AND REGULATIONS

2.13 Timing of Calls

- 2.13.1 Unless otherwise indicated in this Tariff, on Station-to-Station calls and on Direct-Dialed calls chargeable time begins when the called station answers and the connection is established between the calling station and the called station, miscellaneous common carrier, mobile radio system, or PBX system. Answer detection is determined based on standard industry answer detection methods, including hardware and software answer detection. However, when Services are directly connected to a Customer-provided communications systems at the Customer's or End User's premises, chargeable time begins when a call terminates in, or passes through, the first Customer equipment on that Customer-provided communications system. It is the Customer's responsibility to furnish appropriate answer supervision to the point of interface with the Company's Service so that chargeable time may begin.
- 2.13.2 On Person-to-Person calls, chargeable time begins when connection is established between the calling person and the particular person or station specified or an agreed alternate.
- 2.13.3 Unless otherwise indicated in this Tariff, chargeable time ends when the calling station hangs up thereby releasing the network connection. If the called station hangs up but the calling station does not, chargeable time ends when the network connection is released either by the automatic timing equipment in the telecommunications network or by the operator.

2.14 Rate Periods

2.14.1 General

Different rates may be applicable to a call at different times of the day and on certain days of the week, as specified in the appropriate rate schedule for that call. All times shown are local time at the calling station in the case of an outbound call and at the called station in case of an inbound toll free call.

2.14.2 Reserved for future use

SECTION 2 - RULES AND REGULATIONS

2.15 Determining Rate In Effect

For outbound Services that are time-of-day sensitive, the time-of-day at the central office or POP associated with the calling station determines the rate in effect. For Toll Free Services that are time-of-day sensitive, the time-of-day at the central office or POP associated with the called station determines the rate in effect. If a unit of time is split between two (2) or more rate periods, each rate period applies to the portion of the call that occurred during that rate period rounded to the nearest billing increment. If a call is completed by an operator, the time at the beginning of each initial or additional rate period determines the applicable rate period. When a message spans more than one rate period, total charges for each rate period are calculated and the results for each rate period are totaled to obtain the total message charge.

2.16 Application of Charges

2.16.1 Rounding

Each usage sensitive Switched Service has its own specific initial period and additional period (collectively referred to as billing increments) as specified in Section 3 of this Tariff. For all Services, fractions of a billing increment are rounded up to the next higher increment for billing purposes. The usage charges for each completed call during a billing month will be computed. If the charge for the call includes a fraction of a cent of \$.005 or more, the fraction of such charge is rounded up to the next higher whole cent. Otherwise, the charge is rounded down to the next lower whole cent. Rounding for charges for Service(s) is on a call-by-call basis.

2.16.2 BTN Account Changes

(A) Discounts

A change in Service or enrollment in a promotional offering that impacts the Customer's usage discount is effective on the first day of the next billing cycle after the change order is processed.

SECTION 2 - RULES AND REGULATIONS

2.16 Application of Charges

2.16.3 Monthly Recurring, Optional Feature or One-Time Charge

The Company may impose a surcharge on its Customers to recover amounts it is required by governmental or quasi-governmental authorities to collect from or pay to others in support of statutory or regulatory programs. For Switched Services, these taxes, surcharges, and fees are calculated based upon the point of origination of the call, the point of termination of the call, the length of each call, and the taxing jurisdiction's rules and regulations. All federal, state, and local taxes, surcharges, and fees (i.e., sales tax, gross receipts tax, municipal utilities tax, etc.) are listed on the Customer's invoices, and unless otherwise specified herein, are not included in the rates listed in this Tariff.

This feature requires that the VPN Customer's Switched Access lines be presubscribed to the Company for the provision of interstate service.

.3 Forced On-Net

Forced On-Net enables a VPN user to dial another station within the same VPN service using the North American Dialing Plan and have the call routed as if the user had dialed the private number.

¹This Service is no longer available for new Customer term plan agreements effective July 15, 2006. Existing Customers may add, move, remove or change lines and/or locations for the duration of their current term plan agreement. .4 Network Overflow

Network Overflow provides the ability for VPN On-Net calls to be routed over an alternate route should the primary route (or subsequent alternate routes) be busy. For example, if a VPN On-Net call cannot be completed due to a busy condition, the call can be routed over another dedicated switch/trunk group or over public network facilities. Network Overflow can only be applied to VPN Dedicated Access lines.

.5 Call Screen Routing

Call Screen Routing provides the capability to screen or route calls based on a number of parameters, such as the ANI from a switched line. VPN Customers may choose to block calls to a particular geographical area, or route calls depending on time of day, day of week, or day of year. Customers may subscribe to CSR features without subscribing to VPN Authorization Codes.

.6 VPN Authorization Code

Customers must subscribe to CSR in order to obtain VPN Authorization Codes. The VPN Authorization Code is used to override CSR restrictions imposed on the VPN Service. When a call screen restriction is reached, the VPN user(s) will be informed by an announcement that they do not have the proper authority to place the call. To override the restriction and enable the call to proceed, user(s) are required to enter a VPN Authorization Code with the appropriate Authorization Level. The VPN Authorization Code may be from one (1) to twenty-three (23) digits in length.

.7 Re-Origination

Re-Origination allows VPN members to make multiple calls during a single remote access session. That is, rather than redialing the remote access toll-free number for each successive call, the VPN member may simply press the pound (#) key on the telephone keypad on completion of a call and dial the next number the member wishes to call. The VPN member may make up to four (4) re-originated calls. A separate call detail record will be created for each individual call.

.8 Account Codes

Account Codes are optionally available with VPN Service.

3.10 Miscellaneous

3.10.1 Account Codes

- (A) Account codes are an optional feature associated with outbound long distance Service that provides the Customer the ability to track usage by requiring the caller enter a string of digits ("digit string"). Account codes enable the Customer to obtain call detail from the Company which is sorted and summarized based on digits entered by the caller. The call detail is provided to the Customer without charge.
- (B) Account codes are available to Business Customers that (1) subscribe to one of the Company's outbound long distance service offerings described in Section 3.7 of this Tariff for the provision of interstate, intrastate InterLATA, and intrastate IntraLATA Service; (2) request the optional feature; and (3) are billed via a Company direct bill or a shared LEC or CLEC bill. Account codes are not available with VPN, TFS or calling card Service. To subscribe to Account Codes for intrastate calling, the Customer must also subscribe to one of the Company's outbound Service offerings for the provision of interstate calling.
- (C) The length of the string digits available to a Customer is limited and the number of digits is based on whether the call originates at an On-Net or Off-Net location. The Company controls the length of the string digits. The caller will be allowed three (3) attempts to enter a valid account code before the call is terminated.
- (D) The account codes are available on a mandatory and non-mandatory basis. If the Customer subscribes to the mandatory feature, the caller must enter account codes for the call to complete. If the Customer subscribes to the non-mandatory feature, the caller may bypass entering the code by pressing the pound key (#) on the keypad.
- (E) The account codes are available on a validated and non-validated basis. If the Customer subscribes to the validated feature, the caller must enter specific account codes in order to complete the call. If the Customer subscribes to the non-validated feature, the caller may enter any digits as an account code as long as the string is the designated number of digits in length.
