- 2.28.2 911 information consisting of the names, addresses and telephone numbers of all telephone customers is confidential. The Company will release such information via the Data Management System only after a 911 call has been received, on a call by call basis, only for the purpose of responding to an emergency call in progress.
- 2.28.3 The 911 calling party, by dialing 911, waives the privacy afforded by non-listed and non published service to the extent that the telephone number, name, and address associated with the originating station location are furnished to the Public Safety Answering Point.

3.2 Product Descriptions (Continued)

3.2.3 Directory Listings

For each customer of Hargray, Inc.'s Exchange Access Service (s), the Company, shall arrange for the listing of the Customer's main billing number in the directory(ies) published by the dominant Local Exchange Carrier in the area at no additional charge. At a Customer's option, the Company will arrange for additional listings at an additional charge.

3.2.4 Residential Service

Residential Service provides the customer with a single analog, voice grade telephonic communications channel which can be used to place or receive one call at a time.

3.2.5 Optional Service

3.2.5.A General

The service features in the following list are telephone service arrangements, equally applicable to business and residential service, which may be provided only from central offices equipped to provide them.

1. Call Waiting - By means of a tone signal, a customer who is using his telephone is alerted when another caller is trying to reach that telephone number. This service permits putting the first call on hold so that a second call can be answered.
2. Cancel Call Waiting - This feature allows a customer with the Call Waiting feature to cancel the operation of Call Waiting for one call. The customer dials the Cancel Call Waiting code and dial tone is heard. Without hanging up, the customer then places the call. During this call only, the Call Waiting feature is inactive. Call Waiting tones will not interrupt this call.
3. Call Forwarding - Permits a customer to transfer all incoming calls to another telephone number. The customer pre-selects a second telephone number to which all incoming calls are to be transferred automatically. Calls may be transferred to a long distance message telecommunications point subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. Call Forwarding shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part, of message toll charges that would regularly be applicable between the access line originating the call and the access line to which the call is transferred. Customers utilizing Call Forwarding service are responsible for the payment of charges for each toll call between his access line and the distant access line to which the call was transferred.
4. Three Way Calling - Enables a customer to add a third party on an existing call without operator assistance, thereby establishing a three way conversation. The transmission quality may vary depending on the distance and routing necessary and may not necessarily meet normal standards.
5. Speed Calling - Enables a customer to place calls to other telephone numbers by dialing a one or two digit code rather than the complete telephone number. A customer may subscribe to either the 8-code capacity or 30-code capacity on their line.
6. Automatic Recall - Enables a customer to automatically return the last incoming call. If the call back number is busy, this feature allows a user to camp on or queue the called party. When an on-hook condition is detected, both numbers will ring to establish the call.

3.0 - DESCRIPTION OF SERVICE

3.2 Product Descriptions (Continued)

7. Customer Originated Trace - This feature allows a customer to request an automatic trace of the last incoming call. This provides an easy way to trace obscene, threatening or harassing calls. A Call Trace may be activated at any time during or immediately following the call to be traced. (T)
8. Caller ID Plus - This feature delivers calling party information to parties being called. Calling party information may indicate the directory number/name of the calling party or may indicate the number/name of the calling party is private or unavailable. (T)
9. Toll Restriction - Restricts associated line from reaching dialing codes required to access long distance carrier networks to place long distance calls.
10. Automatic Redial - Automatic Redial, when activated, automatically redials the last number the customer attempted to call. If the called line is busy, a confirmation announcement is heard, the customer hangs up, and a queuing process begins. For the next 30 minutes, both the calling and called lines are checked periodically for the availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed. (T)
11. Calling Number Delivery Blocking - Calling Number Delivery Blocking enables customers to prevent the transmission of their Directory Number on all outgoing calls placed from the customer's line. This feature is in operation on a continuous basis. A service order is required to establish or remove this features.
12. Anonymous Call Rejection (ACR) - Anonymous Call Rejection allows customer to automatically reject incoming calls when the call originates from a telephone number which has invoked a blocking feature that prevents the delivery of their number to the called party. When Anonymous Call Rejection is activated on the customer's line and an incoming call marked private is received, the called party's telephone will not ring. Rejected calls are routed to an announcement and subsequently terminated. The announcement informs the calling party that the person he or she is trying to reach will not accept the call as long as the calling number is not delivered. Incoming Calls are checked for acceptance or rejection by Anonymous Call Rejection regardless of the current state of the ACR customer's line (that is, whether or not it is off hook or idle).
13. Selective Call Rejection (SCR) - Selective Call Rejection provides the customer the ability to prevent incoming calls from up to 30 different telephone numbers. A screening list is created by the customer either by adding the last number associated with the line (incoming or outgoing), or by pre-selecting the telephone number to be blocked. When a call is placed to the customer's number from a number on the screening list, the caller receives an announcement indicating that the party he is attempting to call does not wish to receive the call at this time.

This feature will not work if the incoming call is from a telephone number in a multi-line hunt group, unless the telephone number is the main telephone number in the hunt group or is Telephone Number identified.

3.0 - DESCRIPTION OF SERVICE

3.2 Product Descriptions (Continued)

14. Selective Call Acceptance (SCA) - Selective Call Acceptance provides the customer the ability to allow incoming calls only on selected phone numbers in a list of up to 30 different telephone numbers. A screening list is created by the customer either by adding the last number associated with the line (incoming or outgoing), or by pre-selecting the telephone number to be accepted. When a call is placed to the customer's number from a number not on the screening list, the caller receives an announcement indicating that the party he is attempting to call does not wish to receive the call at this time.

This feature will not work if the incoming call is from a telephone number in a multi-line hunt group, unless the telephone number is the main telephone number in the hunt group or is Telephone Number identified.

15. Distinctive Ringing – Distinctive Ringing provides a distinctive ringing pattern to the subscribing customer for up to 30 specific telephone numbers. A screening list is created by the customer by pre-selecting the telephone numbers to trigger an alert. When a call is received from one of the predetermined telephone numbers, the customer is alerted with a distinctive ringing pattern (short, long, short). Calls from telephone number that are not on the screening list will produce a normal ring. (T)

This feature will not work if the incoming call is from a telephone number in a multi-line hunt group, unless the telephone number is the main telephone number in the hunt group or is Telephone Number identified.

16. Selective Call Forwarding - Selective Call Forwarding allows the customer to transfer selected calls to another telephone number. A screening list of up to 30 numbers is created by the customer. Subsequently, calls from any of the number in the screening list, provided the calling number can be obtained, are forwarded to the Selective Call Forwarding telephone number.

If the customer also subscribes to Selective Call Rejection and the same telephone number is entered on both screening lists, the Selective Call Rejection feature must be deactivated to allow the call to forward.

This feature will not work if the incoming call is from a telephone number in a multi-line hunt group, unless the telephone number is the main telephone number in the hunt group or is Telephone Number identified.
