3. Rules and Regulations

3.1 Obligation and Liability of the Telephone Company

3.1.1 Availability of Facilities and Equipment

The Telephone Company's obligation to furnish Services is dependent upon its ability to secure and retain, without unreasonable expense, suitable facilities and rights for the construction and maintenance of the necessary facilities, pole lines, circuits and equipment. Products and services will be available in accordance with this tariff, where technically feasible.

The installation and restoration of Services shall be subject to the regulations set forth in this Tariff.

3.1.2 Interruptions of Service

In the event of an interruption to the service not due to the negligence or willful act of the customer or customer premises equipment, an allowance will be made if the interruption continues for more than twenty-four (24) hours from the time it is reported to or detected by the Telephone Company, upon customer request.

The customer is responsible for providing a suitable supply of commercial electrical power, including outlets, when and where required by the Company for the operation of any Company telecommunications equipment on the customer's premises. Failure to supply adequate commercial electrical power is considered negligence of the customer. A customer may be billed a service dispatch charge whenever a dispatch is made to correct a service interruption caused by the customer failure to pay for commercial electrical service.

In the event the Customer is affected by such interruption, not due to customer negligence, for a period of less than twenty-four (24) hours, no adjustment will be made. No adjustments will be earned by accumulating non-continuous periods of interruption.

3.1.3 Liability

In view of the possibility of errors and difficulties occurring in the transmission of messages by telephone, and the impossibility of fixing the cause thereof, the customer assumes all risks connected with the service except as follows:

If the initial installation is defective or if service is interrupted for more than twenty-four (24) hours otherwise than by the negligence or willful act of the customer or due to customer premises equipment, an allowance limited to the prorated portion of the monthly rate or guarantee for the service or portion thereof interrupted, shall be made after notice and demand to the Telephone Company. No allowance shall be made for interruptions due to the inside wiring or customer provided equipment.

The advertised speeds of the customer's modem may not be attainable with this service and are not guaranteed by the Telephone Company. The Telephone Company will assure, however, that its local exchange access lines meet standards.

3.1.4 Directory Errors and Omissions

The Telephone Company's liability for damages due to errors or omissions in directory listings will be limited to a credit of one month's basic service. (C)

In the case of extra listings in the alphabetical section of the directory for which a charge is made, the Telephone Company's liability shall be limited to an amount not to exceed the established rate for such listing during the period which the error or omission continues.

The customer indemnifies and holds the Telephone Company harmless against any and all claims for damages caused or claimed to have been caused, directly or indirectly, by the publication of the listing which the customer has requested be omitted from the telephone directory or the disclosing of such a listing to any person. (C)

Each customer shall be entitled, without charge, to a directory for each area within the Telephone Company service areas within the State of South Carolina.

3.1.5 Transmitting Message

3.1.6 Use of Connecting Telephone Company Lines

When suitable arrangements can be made, lines or other telephone companies may be used in establishing wire connections to points not reached by this Telephone Company's lines. In establishing connections with the lines of other companies, the Telephone Company is not responsible or liable for any action of the Connecting Company. Connection of the Telephone Company's lines to the lines of another telephone company shall be the sole discretion of the Telephone Company.

3.1.7 Defacement of Premises

The Telephone Company shall exercise due care in connection with all work done on customer's premises. No liability shall attach to the Telephone Company by reason of any defacement or damage to the customer's premises resulting from the existence of the Telephone Company's facilities and associated wiring on such premises, or by the installation or removal thereof, unless such defacement or damage is the direct result of the sole negligence of the Telephone Company. The customer sole remedy for such damage shall be repair of such damage.

3.1.8 Call Features

The Telephone Company shall not be liable for any loss of damages arising out of error, interruptions, defects, failure or malfunctions of Call Features associated with Telephone Company's Services. During the application process, the Telephone Company may check commercial credit services or past telephone account information in order to establish a credit risk assessment and/or use in establishing any deposit amount that may be required.

Any change in rates or regulations prescribed by public authority having applicable jurisdiction, modifies all terms and regulations of the Services to the extent of such changes.

The Telephone Company reserves the right to refuse service to any applicant who is found to be indebted to the Telephone Company or its affiliates for service previously furnished until satisfactory arrangements have been made for the payment of all such indebtedness. The Telephone Company limits the length of any listing in the directory by the use of abbreviations when, in the opinion of the Telephone Company, the clearness of the listing or the identification of the Customer is not impaired thereby.

Listings shall conform to the incumbent telephone company's practices with respect to its directories.

Listings are regularly provided in connection with all classes of Exchange Service, unless the Customer subscribes to Non-published or Non-listed Service. Ordinarily, listings are automatically included in the directory. A listing, however, may be omitted upon request of a Customer when, in the judgment of the Telephone Company, the omission of the listing is warranted by the circumstances of the particular case.

The Telephone Company will furnish upon request the name and address of the Customer when used to provide recorded announcements under the provisions of this Tariff.

One listing included with each subscriber's primary line service, termed the Primary Listing, is provided in accordance with the incumbent telephone company's directory practices.

- A. 3.2.11 Payment for Facilities and Services

The customer is held responsible for all charges for Services rendered and furnished to the Customer including any FCC-approved end user charge, billed monthly in advance. The Customer shall also pay for long distance service charges that may be billed by the Telephone Company, including charges for toll messages in which charges have been reversed and also nonrecurring service charges when billed. The Customer is also responsible for any charges transferred to the Customer's account from terminated accounts billed to the same Customer.

The Telephone Company reserves the right to assess late payment charges for Customers whose accounts(s) have an unpaid balance from the prior billing period. Any charges not paid in full by the due date indicated on the billing statement may be subject to a late fee of 1.5% per month.

The Telephone Company may provide for the arrangement of a deferred payment plan to enable a residential customer to make payment by installments where the customer is unable to pay the amount due for service. The deferred payment plan may require the affected customer to maintain his/her account current and pay not less than 1/6 of the outstanding balance for a period not to exceed six months. The outstanding balance may include the authorized late payment charge.

3.2.12 Construction, Installation and Maintenance Charges

Construction performed under this Section shall be at the sole discretion of the Telephone Company.

Special charges in the form of installation charges, monthly charges, or both are applied in addition to the usual service charges and monthly rates, when, because of the sporadic or occasional nature of the service or an unusual investment or expense, the revenue does not reasonably compensate the Telephone Company, for example:

- A. The facilities are not presently available, and there is no other requirement for the facilities so constructed.
- B. The facilities are provided in remote or undeveloped sections or if the facilities are provided on a temporary basis.
- C. The facilities are of a type other than that which the Telephone Company would normally utilize in the furnishing of its services.
- D. The facilities would be deployed over a route other than that which the Telephone Company would normally utilize in the furnishing of its services.
- E. The facilities would be constructed on an expedited basis.
- F. The facilities would be in a quantity greater than that which the Telephone Company would normally construct.
- G. The facilities would be constructed on a temporary basis until permanent facilities are available.
- H. The facilities would be constructed in advance of Telephone Company's normal construction.
- I. The conditions require the provision of special facilities or unusual methods of plant construction, installation, or maintenance.
- J. The Customer's location requires the use of costly private right-of-way.

Title to all construction, provided wholly or partly at a Customer's expense, is vested in the Telephone Company.

Construction charges will include materials, contract services, and loaded labor. The Customer is required to bear unusual maintenance costs for special construction.

Overhead loading of labor is calculated with a composite allocation factor that is based on plant, construction, and engineering personnel salaries and expenses; supervision, pension expense, insurance, unemployment and social security taxes. This factor is developed annually by determining the relationship of the above expenses to the total payroll base. It is applied to expenses for construction, removals, plant and central office maintenance.

The Telephone Company will provide an estimate of actual charge to the Customer prior to the start of construction.

When attachments are made to poles or other companies, in lieu of providing construction for which the Customer would be charged under the provisions hereof, the cost to the Telephone Company for such attachments are borne by the Customer.

The Customer is required to pay construction charges as made by another company providing facilities connecting with the facilities of the Telephone Company.

Construction charges will not apply to the Customer's station installation that includes the aerial drop that extends from the last pole to the demarcation point. Refer to Glossary of Definitions and Terms for explanation and examples of the term "Demarcation Point."

Installation of facilities within subdivisions shall be underground where underground treatment is the usual form of installation.

The following definitions are used with regard to facilities constructed and owned by the Telephone Company:

The provision of the underground facilities will be at no charge, except where a charge is permitted in this Tariff.

Rights-of-Way and Easements - Within the applicant's subdivision, the Telephone Company will construct, own, operate, and maintain underground facilities only along public streets, roads and highways which the Telephone Company has the legal right to occupy, and on public land and private property across which rights-of-way and easements satisfactory to the Telephone Company may be obtained without cost or need for condemnation by the Telephone Company. Rights-of-way and easements, within the subdivision, satisfactory to the Telephone Company, must be provided by the applicant within reasonable time to meet construction and service

requirements before the Telephone Company required to commence its installation, such rights-of-way and easements must be provided by the applicant at no charge to the Telephone Company, be cleared of trees, tree stumps and other obstructions and be graded to within (6) inches of final grade. Such clearance and grading must be maintained by the applicant during construction by the Telephone Company.

Advances by the Applicant

- A. Where, due to the manner in which a subdivision is developed, the Telephone Company is required to construct an underground distribution system through a section or sections of the subdivision where service will not be connected for at least (2) years, then, the Telephone Company may require a reasonable advancement for the construction from the applicant before construction is commenced, to guarantee performance.
- B. Where the subdivision is developed in a uniform manner so that the Telephone Company may restrict the construction of its underground telephone distribution system to a section or sections in which buildings or multiple-occupancy buildings are being constructed, the Telephone Company may not require an advance.
- C. If an advance is required under these rules, then the advance, without interest, shall be returned to the applicant on a pro rata basis as the permanent service connection is made to each building or multiple-occupancy building.
- D. Any portion of an advance remaining unrefunded ten (10) years from the date the Telephone Company is first ready to render service with the extension will be retained by the Telephone Company and credited to the appropriate construction account.

Temporary Facilities

- A. Temporary facilities may be installed to provide service, when necessary, for a maximum period of one (1) year.
- B. When it is necessary to place temporary facilities in advance of the permanent underground telephone system in order to provide telephone service, the Telephone Company may require the applicant to pay the estimated unrecoverable costs of the temporary facilities. If the required costs under the above-described conditions apply, the Telephone Company has the right to refuse installation of the temporary facilities until the required costs are paid to the Telephone Company.

Special Type of Construction

When underground service connections are desired by Customers as initial installation in places where aerial drop wires would ordinarily be used to reach the Customer's premises, or when aerial facilities are used to provide service to a customer and subsequently the Customer desires that such facilities be placed underground, the following regulations apply:

- A. Where cable is laid in conduit, the underground conduit shall be constructed and maintained by or at the expense of the Customer and in addition, the Customer shall pay the cost of the underground cable, including the cost of installing, less the estimated cost to the Telephone Company of installing such aerial facilities as would be (or are) required to furnish the same service. - C. Where conductors are laid in a trench, the trench shall be constructed and backfilled by or at the expense of the Customer. In addition, the Customer shall pay the cost of the conductors,

- including the cost of installing, less the estimated cost to the Telephone Company of installing such aerial facilities as would be (or is) required to furnish the same service.
- D. Cable or wire installed in conduit will be maintained and replaced at the expense of the Telephone Company where the conduit has been inspected in place by the Telephone Company and approved, but repairs or replacements of cable or wire in conduit not so inspected and approved, or repairs or replacements of cable or wire in conduit or trench made necessary by damages caused by the Customer or his representative will be made only at the Customer's expense.
 - E. Where facilities are changed from aerial to underground, in addition to the above, the Customer is charged the cost of dismantling and removing the aerial facilities.

4.8 Customer Initiated Temporary Suspension of Service – Seasonal Suspension

A Customer may request a temporary suspension of Service to accommodate extended absence needs for vacation, etc. Requests for suspension cannot exceed three (3) consecutive months, and can only be applied to the Telephone Company customer's account one (1) time per calendar year. During this suspension period, there is no access to essential services such as 911. **This Suspension of Service offering with no fixed option timeframe has been discontinued as of September 25, 2006. Existing subscribers will be able to keep this service until the suspension has lapsed. Please refer to Seasonal Suspension Service below.**

Seasonal Suspension Service may be in three (3), four (4), five (5) or six (6) consecutive month increments, and can only be applied to the Telephone Company customer's account one (1) time per calendar year. Refer to Section 4.4 Other Services and Charges and Appendix A for rates.

Access to essential services such as 911 as well as 611 calls terminating at the Telephone Company will be available. Seasonal Suspension service also includes Voice Mail if requested by the customer. If the customer does not provide a restore service date, Telephone Company will restore service and resume billing after the suspend date option requested. The restored service will be the same and will reflect the same features as the service prior to the suspension.

Use of the Temporary Suspension of Service option allows the customers to not be charged a disconnect service order charge and a new connect service order charge, while maintaining their telephone number. All other monthly recurring charges are waived for the suspended period. If promotional pricing is in effect at the start of the suspension period, the promotional period will not be extended for the period of the seasonal disconnect.

For example, in January, a customer requests an additional line promotion that is priced at fifty percent (50%) of the regularly tariffed rate for the first six (6) months. The customer requests a seasonal disconnect for three (3) months beginning in April. When the service is restored in July, the original promotional time frame has expired and the customer will no longer receive the promotional rate.

Additionally, if rates for any of the services that the customer subscribes to have been increased or decreased during the suspension period, the customer's service will be billed at the rate in place at the time of termination of seasonal disconnect.

The monthly, per line charge for Seasonal Suspension Service can be found in [Appendix A](#) of this Tariff.
